- Input voltage: 110V
- 6000-B Power - 1800 watts (RMS power)
- 8000-B Power - 2400 watts (RMS power)
- Optional on-board heaters and SS tank lids

The B Series processors are the most powerful linear cleaners on the market. Originally built for mini blind cleaning. The B Series Cleaners are ideal for industrial application such as cleaning pipes, cable, shafts, wire and other long narrow items that may require precision cleaning. The B Series cleaners are available with optional on board heating systems and stainless steel lids.
